Ensure secure access to corporate data whenever, wherever
Provide a predictable monthly expense, avoiding large capital IT outlays

Desktops-as-a-Service (DaaS)
Nzinganet Desktop virtualization is a powerful software technology that separates the desktop environment and associated application software from the physical client device that is used to access it. By offering this service we are able to provide, you the customer, with the same applications and feel as your desktop PC, at a fraction of the cost, and implement the service in hours, not days or weeks as it normally takes to order and have a desktop machine configure and deliver. Desktop Virtualization can be used in conjunction with application such as Windows and custom software which provides a comprehensive desktop environment management system. In this mode, all the components of the desktop are virtualized, which allows for a highly flexible and much more secure desktop delivery model.
