

By using NzingaNet hosted services, you can:

- Delight your employees with the freedom of using devices of their choice
- Deliver workspaces on any device while preserving data security
- Relieve users or IT personal of planning device or software upgrades
- Ensure secure access to corporate data whenever, wherever
- Provide a predictable monthly expense, avoiding large capital IT outlays

Network as a Service (NaaS).

Nzinganet provides the ability to offer a wide variety of network services—such as advanced firewalls, quality-of-service (QoS) controls, VPNs and WAN optimization—on demand gives you the customer a valuable means to meet complex enterprise requirements. CloudPlatform enables our customers to order, deploy, and manage NaaS offerings by orchestrating and managing a wide variety of software- and hardware-based network services, and by integrating NaaS usage statistics into the platform's billing and reporting capabilities customers can see usage and performance.
